

## **iHOSPITAL MANAGEMENT SYSTEM**

**iHMS** is powerful, flexible and easy to use and has designed and developed to deliver real conceivable benefits to hospitals and clinics. And more importantly it is backed by reliable and dependable iSakura support.

**iHMS** designed for multi specialty hospitals, to cover a wide range of Hospital administration and management processes. It is an integrated client server application developed in .NET and SQL Server as back end. It provides for enquiries about the patient, the patient's location, admission, and appointment scheduling and discharge details. Furthermore, this system even takes care of package deals for a patient for a fixed cost. Medical Record keeps an abstract of clinical data about patients. It allows easy retrieval of medical records on patients.

Most importantly the iHMS provides the web based solutions for Hospitals. So, iHMS can be implemented in all the branches of the hospital and all the tasks are monitored and maintained. It is supported by all the web browsers, motivates new features, better integrity and security.

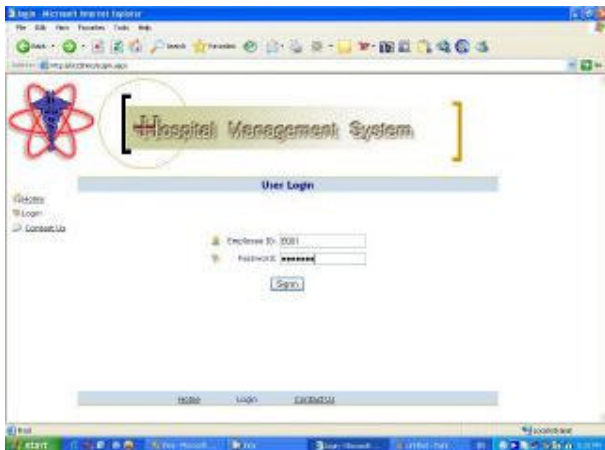

**It covers the following modules:**

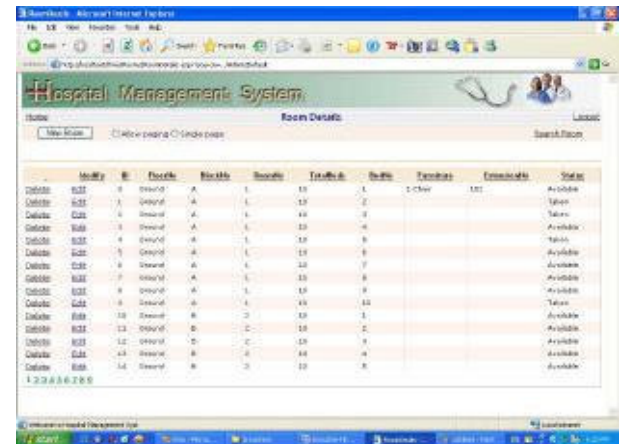

- ✎ Patient Registration Details
- ✎ Employee Registration Details
- ✎ Billing
- ✎ Stock Details
- ✎ Patient History Details
- ✎ Employee Administration
- ✎ Employee Leave Maintenance
- ✎ Pharmacy & Laboratory maintenance
